SUMMARY

Final-year B.Tech student in Computer Science & Engineering (AI & ML) with hands-on experience building production AI/LLM-integrated applications, Published researcher in *Scientific Reports* (Q1 SCIE, IF 4.3) with strengths in prompt engineering, n8n-based Agentic workflow automation, and cloud deployment across Azure and AWS. Seeking AI Engineer roles.

EXPERIENCE

Enarin Business Solutions

Mar 2026 – May 2026

AI Engineer Intern

Remote

- Built & Integrated LLM APIs into backend to power CV parsing, Assessment-Generation, evaluation, and automated recruitment workflows through prompt-engineering and structured-output pipelines.
- Rapidly prototyped and delivered an end-to-end assessment generation and AI-proctored examination system, taking it from concept to a production-integrated PoC within the ATS platform.

Enarin Business Solutions

Dec 2025 – Feb 2026

Machine Learning Intern

Remote

- Translated business logic for candidate-job matching into a working prototype, then iterated it into a production-ready ML and NLP scoring system..
- Leveraged AI-assisted development tools and OpenAI Codex to accelerate prototyping, experimentation, and deployment of hiring intelligence solutions.

Alliance University

Aug 2025 – Jan 2026

Undergraduate AI Researcher

Bangalore, India

- Published peer-reviewed research in *Scientific Reports* (Nature Portfolio, Q1 SCIE, IF 4.3) and designed a hybrid MRFO-Bayesian Optimization framework for CNN hyperparameter tuning, achieving **98%** classification accuracy using DL Frameworks.

PROJECTS

Agentic Logistics Intelligence Automation workflow

n8n • Gemini API • OCR • Gmail API • Workflow Automation

- Built a multi-agent AI workflow that transforms logistics documents into structured business decisions through OCR, information extraction, validation, risk assessment, and ERP-ready data transformation.
- Engineered agentic workflow automation using n8n and Gemini, integrating prompt-driven AI agents, webhook orchestration, and automated email notifications.

Resume & Market Skill-Gap Analyzer – 3rd Place, Microsoft AI for Good Hackathon

Python • LLM APIs

- Rapid-prototyped and deployed an AI tool that analyzes a candidate's resume against live market skill-gap data, producing a detailed breakdown with personalized course recommendations to make the resume job-ready.
- Built and shipped the entire working PoC in under 4 hours, placing 3rd for the fastest functional demo with real-world hiring impact.

Sunder, S. et al. "A Manta Ray-Bayesian Optimization Approach for Hyperparameter-Tuned Convolutional Neural Networks in Lung Cancer Classification." *Scientific Reports*, Nature Portfolio, 2026.

EDUCATION

Alliance University

2023 – 2027

B.Tech, Computer Science & Engineering – AI & ML Specialization | CGPA: 8.45 / 10

Bangalore, India

TECHNICAL SKILLS

Languages: Python, SQL

Gen AI & LLMs: Gemini API, Azure OpenAI, Prompt Engineering, LLM Applications, Retrieval-Augmented Generation (RAG)

Workflow Automation: n8n, Agentic AI, Webhooks, Figma

Deep Learning & Frameworks: TensorFlow, Hugging Face Transformers, Computer Vision, CNN, Hyperparameter Optimization

Backend & Cloud: FastAPI, Django, Docker, Azure App Services, Amazon Web Services

Tools & Practices: Git, GitLab, GitHub Actions, CI/CD, Agile Development, n8n
