SUMMARY

Final-year **Computer Science student** with hands-on experience in **cloud deployment, containerisation, CI/CD pipelines, and backend infrastructure**. Built and deployed production systems using **Docker, GitHub Actions, Azure, and AWS**. Comfortable automating workflows with Python and Bash, integrating REST APIs, and operating services end-to-end from code to cloud. Seeking a **DevOps Engineer / Cloud Engineer** role to contribute to infrastructure reliability, deployment automation, and platform operations.

EXPERIENCE

SeekATS — LogisCareers

Mar 2026 – May 2026

Software Engineer Intern

Remote

- Wrote and maintained **Python and FastAPI backend services** for candidate assessment workflows, handling API endpoints, business logic, and debugging in production.
- Integrated AI inference modules into REST APIs, enabling real-time candidate evaluation and structured reporting for internal teams.
- Collaborated using **Git branching workflows**, pull requests, and code reviews across a remote engineering team.
- Independently set up **Docker containerisation and GitHub Actions CI/CD pipelines** in a local development environment to learn deployment workflows alongside production responsibilities.

Enarin Business

Dec 2025 – Feb 2026

Software Engineer Intern

Remote

- Built **Python automation scripts and data processing pipelines** for large-scale recruitment datasets, reducing manual effort in reporting and candidate ranking workflows.
- Developed and debugged **API-integrated backend services** for internal recruitment platforms, working with structured data ingestion and processing.
- Independently practised **cloud deployment and workflow automation** in a development environment, applying skills in service configuration and environment setup.

PROJECTS

PII Redaction System | Python · FastAPI · Docker · GitHub Actions · OCR

- Containerised a full document-processing pipeline using **Docker**, enabling consistent deployment across environments.
- Set up a **GitHub Actions CI/CD pipeline** to automate testing and deployment of the FastAPI backend service.
- Built REST API endpoints for automated extraction and redaction of sensitive information from PDFs and images.
- Implemented OCR preprocessing, input validation, and error handling for production-grade reliability.

Real-Time Campaign Optimization Engine | Python · Kafka · Spark · PostgreSQL

- Designed and operated a **real-time event streaming pipeline** using Apache Kafka and Spark for high-volume data ingestion.
- Managed PostgreSQL database operations and backend processing workflows under sustained load.
- Implemented monitoring and alerting logic to detect and respond to pipeline failures and throughput degradation.

CodeRAG | TypeScript · FastAPI · FAISS · Azure OpenAI · VS Code API

- Deployed backend services to **Azure App Services**, managing cloud configuration, scaling, and environment variables.
- Built vector search pipelines using FAISS and integrated Azure OpenAI APIs for semantic code retrieval.
- Implemented local indexing, API integration, and version-controlled development workflows using GitHub.

EDUCATION

Alliance University

2023 – 2027 (Final Year)

B.Tech in Computer Science & Engineering — AI & ML Specialisation | CGPA: 8.15 / 10

Bangalore, India

TECHNICAL SKILLS

Cloud & Infrastructure AWS (EC2, S3, IAM), Azure App Services, Cloud Deployment, Linux

DevOps & CI/CD Docker, GitHub Actions, CI/CD Pipelines, Containerisation, Bash Scripting

Backend & APIs Python, FastAPI, REST APIs, Git, GitHub, TypeScript

Data & Streaming Apache Kafka, Apache Spark, PostgreSQL, FAISS

Monitoring & Tools Logging, Debugging, API Integration, Automation Scripting

CERTIFICATIONS

- Microsoft Certified: Azure AI Fundamentals (AI-900)** — Microsoft
- Machine Learning — Elite** — NPTEL, IIT Kharagpur
